

Rawad Al Abboud

ML/AI Engineer • Data Scientist • GenAI Developer

rawadabboud.ra@gmail.com | +33 6 95 05 31 92 | Paris, France

SUMMARY

ML/AI Engineer building production GenAI systems and data pipelines. Proven track record of measurable business impact: 4,400+ AI-qualified calls, a RAG assistant serving 150k+ clients, and deployed tool-calling applications in production.

EXPERIENCE

Hipto, GenAI Developer

Oct 2025 – Present

Lead Generation, Paris

- Launched a production Click-to-Call voice platform (NestJS, Retell AI, OpenAI): **4,400+ AI-qualified calls** across 5 verticals and 13 experiment profiles.
- Architected 7 voice-agent pipelines with 60+ HTTP endpoints covering transfer, follow-up, and cold-lead workflows.
- Delivered a RAG assistant for **Groupe Hueber Assurances** (150k+ clients): hybrid BM25 + cosine retrieval, LLM reranking, SSE streaming, and a 40-question eval set.
- Shipped **Hipto Offer Hub**, an MCP app embedded in ChatGPT and Claude with 10+ tool calls, eligibility checks, and lead capture across 57 offers.
- Prototyped an ML conversion-scoring module (CatBoost, FastAPI): calibration, temporal backtests, feature engineering, and a Streamlit monitoring dashboard.

Clariane & Paris Brain Institute (ICM), Research Engineer

2023 – 2025

Data Engineering & ML, Paris

- Collaborated with psychiatrists, clinicians, and neuroscience researchers to transform EEG, clinical, and speech data into ML-ready datasets for psychiatric research.
- Automated Python pipelines to ingest, clean, and structure multimodal biomedical data, improving reliability for downstream statistical analysis and predictive modeling.
- Coordinated analytical work with clinical and research teams; co-authored **2 submitted papers** on rTMS acceptability and personalized psychiatric care, and developed dashboards for clinicians.

MINDig, ML Research Intern

Apr – Sep 2022

Rennes

- Developed an EEG-based Parkinson's Disease classifier on a **108-subject cohort** using functional connectivity features.
- Evaluated 5 classifiers with nested 5x2 cross-validation; best model reached **ROC-AUC 0.96** and **88.9% accuracy**.

EDUCATION

EDC Paris Business School

Oct 2025 – Jun 2026

M.Sc. Data Science & Business Analysis, Work-study

CentraleSupélec, Université Paris-Saclay

2021 – 2022

M.Sc. Signal & Image Processing

Lebanese University, Faculty of Engineering

2017 – 2021

Engineering Degree, Telecommunications & Computer Science

TECHNICAL SKILLS

ML & Data Science: Python, pandas, scikit-learn, PyTorch, CatBoost, gradient boosting, feature engineering, classification, signal processing, EEG, calibration, temporal backtesting, model serving

GenAI & LLM Systems: OpenAI API, RAG, embeddings, BM25, reranking, structured outputs, prompt engineering, Retell AI, MCP, Skybridge, ChatGPT Apps SDK

Backend, Data & Cloud: TypeScript, Node.js, NestJS, FastAPI, REST APIs, PostgreSQL, Redis, BigQuery, Docker, GitHub Actions, Google App Engine

PROJECTS

Adaptive RAG Pipeline for Long-Form Document QA

2024 – 2025

Personal Project, NLP / GenAI

- Engineered an end-to-end RAG system over long technical documents using chunking, OpenAI embeddings, FAISS, BM25 + dense retrieval, and cross-encoder reranking.
- Improved answer relevance by **+22%** versus naive top-k retrieval on a 60-question evaluation set, while reducing factual lookup latency by **40%** through query routing and streaming responses with FastAPI.

LANGUAGES & EXTRACURRICULAR

French: Fluent **English:** Fluent **Spanish:** Beginner

TMS-EEG Summer School, Aalto University, May 2025 | **IEEE ULFG-I**, Student Member, 2017–2021
